DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

The abstract of the disclosure is objected for improper language. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet *within the range of 50 to 150 words*. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claims 1-8 are objected to for the following reasons:

Claim 1 recites the limitation "said separable section". This language should read "said first separable section" as more than one separable section has been previously defined.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The features of a first separable section containing a centered upright cone with its periphery joined to the inside bottom edge of said separable section; said bottom edge having holes alternating with raised triangular coin director portions; whereby introduction of paper currency and coins into the bartender's jar are separated by the coins passing through the holes to the bottom of the bartender's jar render the invention novel and non-obvious over the prior art. In the closest prior art, Mertins, Jr. (U.S. Des 403,833, Fig. 1, 5, 6) teaches a bartender's jar, comprising an extruded translucent plastic jar having an open necked portion and a cylindrical body portion having two separable engaging first and second sections and Mehelich (US 3,338,250) teaches a coin sorting structure with semi-circular holes on raised surfaces (Fig. 1). These references, alone or in combination, thus fail to teach or suggest a centered upright cone with a bottom edge having holes alternating with raised triangular coin director portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
